How To Get All The Medicine You Need For FREE!

If you ever felt like you spend a whole great deal of money on medication – and it just had to be an easier way – then this will be the most interesting letter you ever read!

***"My name is Marcus Masterson
and I'm about to let you in on
one of the most well kept secrets
of the Pharmaceutical Companies –
secrets that will literally
allow you to get **free medicine!**"***

**From: Marcus Masterson
Monday, March 12, 2007**

Dear [[name]],

If you ever thought – even for a moment – that you spend a small fortune on medication, then I have great news for you!

All you have to do is take five minutes to read this material and I can guarantee that after you're done you'll realize this is your lucky day! Thing is I just found a way to get all the medicine you need FREE! How about that?

I'm not going to try and slowly work in into this, I'm just going to come straight forward and tell you **the truth!**

FACT #1 – The Pharmaceutical Industry’s Best-Kept Secret

*Despite the growing public outrage about rising costs of prescriptions, most patients – and even many doctors – aren’t aware of the fact that **drug companies give away millions of dollars worth of drugs each year.***

“In 2004 alone, 6.2 million people received 18 million prescriptions – with an estimated value of over \$3.3 Billion – courtesy of drug manufacturers’ patient assistance programs.” – The Pharmaceutical Research and Manufacturers of America (PhRMA)

These free medication programs cover just about every medication available on the U.S. market – from diabetes medications to cholesterol-lowering drugs and heart medication.

FACT #2 – Why So Few People Know About These Programs

Most of these programs are relatively new developments. They gave away 2.8 million prescriptions worth \$500 million in 1998 versus 18 million prescriptions worth \$3.3 billion just six years later, in 2004. So the fact remains that most people – including doctors, nurses, social worker and other health professionals – have no idea that these programs exist.

Surprisingly – or not? – the biggest obstacle may be the drug companies themselves. Today, just about all of the major manufacturers provide free medication programs, but rarely – if ever – publicize these programs. For these companies – who are obviously notoriously profit-driven – the programs are more politics than anything else.

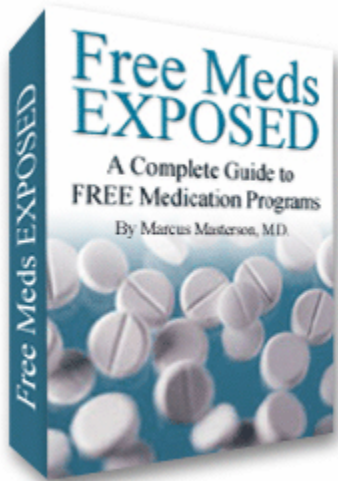

I’m going to be straight forward here and tell you **my honest opinion**: I personally think that the pharmaceutical companies want to keep it a secret. Perhaps they sponsor these programs so that they can tell politicians “We give away free medication” but then they barely publicize these programs so they make it difficult for the average people to find out about them and/of apply.

I work in the medical field as well, and I deal with sick people each day... I know exactly how expensive drugs can be and I’m perfectly aware that there

and many people who just cannot afford them. That's why I find it just selfish and wrong to keep this information from them and from you.

I've invested all of my free time in the past three months into doing research about all of these programs. What I found is just amazing. As I was telling you earlier, you can get almost any drug available on the U.S. market for free... All you need to know is where to go to get it!

I've gathered all of the information I found on these programs, put it all together and created...

"USA Free Meds Exposed"

*the only source
of free medication programs you'll
ever need!*

Can you imagine how much different your life would be if **you could get free medicine-for ever?**

Look what these people have to say about it...

"...for years, we were paying hundreds of dollars per month for my Pain Medication and my husband's Blood Pressure Pills. We had no idea that we could have been receiving our medication for free. Thanks to the information in Free Meds Exposed, we were able to receive all of our medication for free. Now, we are no longer a slave to our medication expenses! We cannot thank you enough."

Karen W.

Tampa, FL

"Medication costs were quickly eating up my parents' savings. Treatment for my father's condition was costing over \$700 per month. I was desperate to help, but I couldn't afford to pay for it myself. The information in Free Meds Exposed helped me eliminate my father's medication expenses 100%..."

**Juanita A.
Phoenix, AZ**

"I am a single working mother with 3 children. Before I found out about your guide, my medication expenses made it impossible for my family to afford any of the 'extras' in life. I was spending close to \$1000 per month just on medication.

Thanks to the info in Free Meds Exposed, I now get most of the medication I need for FREE. It is because of your book, that I am not living paycheck to paycheck anymore. Thank you from the bottom of my heart!"

**Rene S.
Charlotte, NC**

I bet right now you're wondering...

What exactly is "USA Free Meds Exposed"?

It's a guide of all the drugs and medical care free programs available in USA. You will immediately discover exactly what it takes to receive your medication absolutely free; you will get access to more free medication programs than anywhere else.

All information has been verified by employees of each free medication program and you will get full contact information for each & every of these free programs.

Who is eligible for the free medication?

That, my friend, is a really good question. And I can bet that if it was entirely up to the pharmaceutical companies, you will most probably never get your answer...

On top of not publicizing the programs, there are a great number of companies that do not disclose vital information (like exact income requirements) needed to get the FREE medication programs – **on purpose!**

But it's really not my type to just let them get away that easily! So I went ahead and spoke with representatives from hundreds of free medication programs. So here's what I found out: most of the people who apply for these programs are the ones who earn too much to qualify for government assistance, but face financial hardship because they have high medical costs and no insurance coverage for prescriptions.

To get to the bottom of this issue, corporate-sponsored free medication programs are regarded as "very generous" compared to similar federal programs. They only consider income and expenses, ignoring assets – something that often disqualifies people from government programs. So the thing is... the great majority of people **do actually qualify.**

... But don't just take my word for it; living proof to this statement are the hundreds of e-mails I got from people using the priceless information in "USA Free Meds Exposed"; here are just a few:

"I am a physician who has been in practice in New Jersey for the last 15 years. Recently, one of my patients e-mailed me a link to your website. I read the entire website from top to bottom. I must admit, I was a little skeptical- but I decided to get the book anyway. Since getting Free Meds Exposed, I have successfully referred over 50 patients to various Free Medication Programs! You would think that the pharmaceutical reps that visit me regularly would have told me about these programs, but they NEVER HAVE! You have done a real wonder by writing Free Meds Exposed.

"Knowing that I was spending insane amounts of money on medication every month, my friend showed me Free Meds Exposed. I was afraid that I earned too much to qualify for Free Medication Programs. Surprisingly, although I earn well over \$50,000 per year, I still qualified to receive my medication for free. I really appreciate the time and effort you and your staff took to make such valuable information available to the public!"

**Vladimir T.
Burbank, CA**

How much is "USA Free Meds Exposed"?

[[firstname]], you can get all the amazing information in "USA Free Meds Exposed" (the name, overview, requirements, application forms and details and contact information for over 300 programs) for just [[price]]!
